## Our mission is to make your team look great.

We believe great uniforms and teamwear can help create a sense of pride, identity and belonging.

And when that happens, not only do people look great, they feel great too.

To achieve this mission, we design our clothing to achieve the optimal marriage of quality, fit, and 'brandability'.

The garments are then made by our partner factories – factories chosen for their ethics, ability, and quality.

## We believe in treating people right.

Special, unique individuals make Aurora and Cloke garments.

Each person has their own life, their own story to tell.

There's a lot of people globally involved in making garments. Literally millions globally. And in some factories, people are treated like common, disposable items.

We don't like that.

Our own ethics for manufacturing are based on the 12 principles set out by the WRAP Organization (Worldwide Responsible Accredited Production). These principles include the prohibition of forced labour, child labour, abuse, discrimination; and ensure fair compensation, working hours, environment, and health and safety.

Ensuring our partner factories comply starts with selection of the factories. We believe a factory should not only meet these standards 'on paper', but that a culture of care should exist from the top down. Once a factory is selected, we then conduct periodic audits to ensure these standards are upheld. Our audits are conducted by unbiased, professional inspection companies, including SGS Group and Asia Quality Focus.

For further information, visit [www.auroraclimbing.co.nz/ethical-manufacturing](http://www.auroraclimbing.co.nz/ethical-manufacturing)

Terrence Moore  
Managing Director

## What is indenting?

Indenting is when we manufacture garments to your specific requirements.

Starting right from your concept, we take your idea through the intricacies of offshore manufacturing right through to the finished product.

The benefits are huge – we create garments unique to you, for the best price possible, while making the whole process as simple as possible for you.

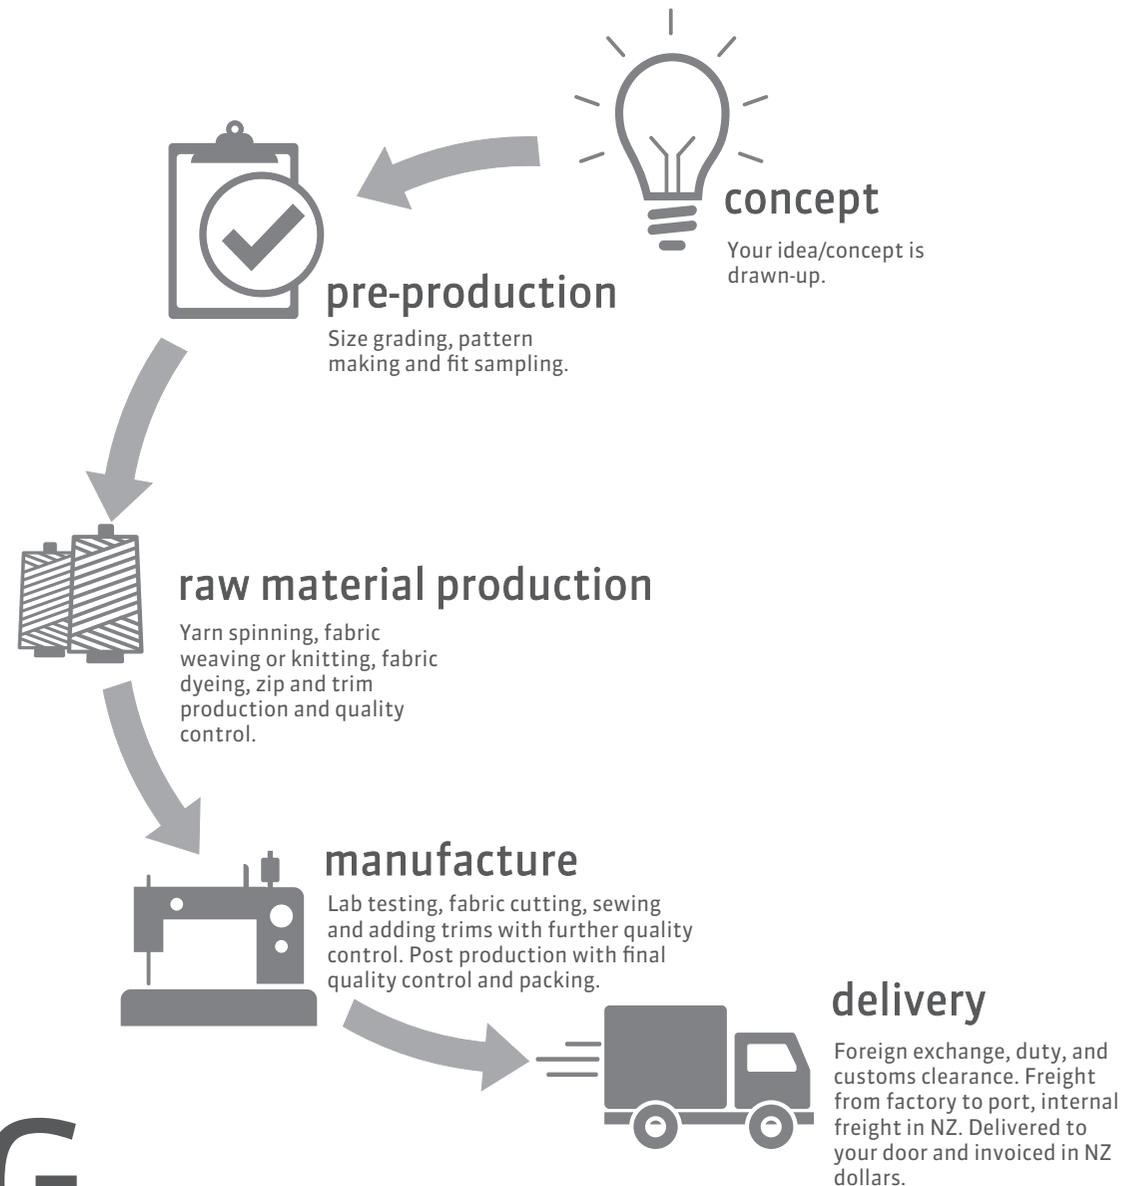

We do the legwork:

Concept development, pattern-making, size grading, yarn sourcing, fabric knitting, weaving, and dyeing, sourcing of zips and trims, pre-production sampling, lab testing, sewing, quality control, packing, foreign exchange, freighting, customs clearance then delivery to your door.

Minimums vary depending on product and fabric, and start from as little as 300 units.

Lead times typically start at 18+ weeks, depending on time of year and other factors.

Give us a call today to talk through your ideas and questions.

## Stock Service

Turn the page to browse our extensive Stock Service collection.

Unlike some retail garments, Aurora & Cloke garments are designed right from the outset for branding, using either screenprinting, embroidery, or other embellishment methods.

All these styles are stocked in New Zealand, and usually available for overnight delivery nationwide.

There is no minimum order; beneficial if someone joins your team or group and you need one more garment.

## The Aurora Brand

Aurora is both classic and contemporary, modern yet timeless.

Designed from the ground up for uniforms, we've taken high performance fabric from the retail arena and injected the necessary practical features and design DNA to make them perfect for team or group wear.

With several product families, the Aurora range is ideal for organizations wanting to project a stylish, coordinated image.

## JACKETS & OUTER WEAR

Look for these features:

**3-Layer Softshell**  
The ultimate in versatility.  
Water resistant, breathable and wind-blocking.

**Hybrid Outer**  
Woven face laminated to a knitted backing improves durability and warmth while retaining the comfort and style of a lighter fabric.

**Breathable**  
The higher the rating, the faster moisture is conducted away from the body.

**Custom Puller**  
This garment can be customized with alternative zip pullers.

**Water Resistant**  
Reflects the weight of water the fabric will stand. The higher the number, the more water resistant. (excludes seams)

**Stretch Fabric**  
4-way stretch for comfort and freedom of movement.

**Styles**  
Complementary mens and womens styles, or adults and kids - great for uniforms.

**Embroidery Access**  
Concealed embroidery access means your logo not only looks great on the outside, but the backing is concealed behind the jacket lining.

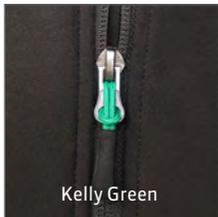

**Cord Management**  
Store your music player safely in its pocket and run the headphone cord through the designated audio access port.

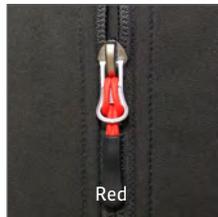

**Insulation**  
When you're serious about warmth. Poly fill insulation between the outer and lining traps air while remaining lightweight enough for everyday wear.

### ZIP PULLER COLOUR OPTIONS.

MICROFLEECE

---

Cloke is the streetwise, sporty younger brother of Aurora.

We've given these slick, edgy styles all the love and attention they need to handle the rough and tough.

And there's a lot of choice when it comes to Cloke.

Most of the hoodies fall into 4 categories:

- 400gsm Super heavyweight: The big daddy of them all – say no more.
- 360gsm Heavyweight: Premium quality and extra cotton. The people's choice.
- 280-300gsm Midweight: The all-rounders. Masses of colour, size and style options.
- 200gsm Lightweight: A.K.A T-shirt hoodies.

Cloke short-sleeve T-shirts and singlets are made from combed and ringspun 100% cotton; basically the nicest T-shirt fabric you can buy.

This is premium stuff, waaay softer, smoother and longer lasting than cheap carded/open-end cotton.

The logo for the brand 'CLOKE' is displayed in a bold, white, sans-serif font. The letters are slightly irregular and spaced out, giving it a street-style or urban feel. The text is centered within a solid black rectangular background.

**CLOKE**

## CONTRAST OPTIONS

With a ton of different drawcord and hood lining options, any Cloke hoodie can be customized to suit your team or group.

In addition, we have 'semi-stock' styles with a massive range of colours available – check out styles CHD and DCH at

[www.auroraclimbing.co.nz](http://www.auroraclimbing.co.nz)

# DOUBLE DRAWCORD

We've doubled the hoodie - or at least it's drawcord.

On-trend in USA, the extra drawcord gives a fresh new take on the classic hoodie.

Available in pullover or zip through.

Fabric: 360gsm, 80% cotton, 20% polyester.  
Brushed inside. Pre-shrunk, anti-pill.  
Smooth print surface.

Features: Lined hood, cord management,  
metal tipped drawcord, bar-tacked pocket.

Fit: Contemporary mens and womens fit.
